

FPSO Vessel Repair, Maintenance and Re-Engineering

Always helping, wherever you are

Customer focussed

In support of small rotating equipment often found on FPSO's or other Upstream and E&P facilities, Greenray Turbine Solutions are an independent service provider, we are not affiliated to any specific product, supplier or manufacturer.

This gives us the flexibility to provide a cost-effective customer focused service, for critical small rotating equipment onboard FPSO's and similar vessels.

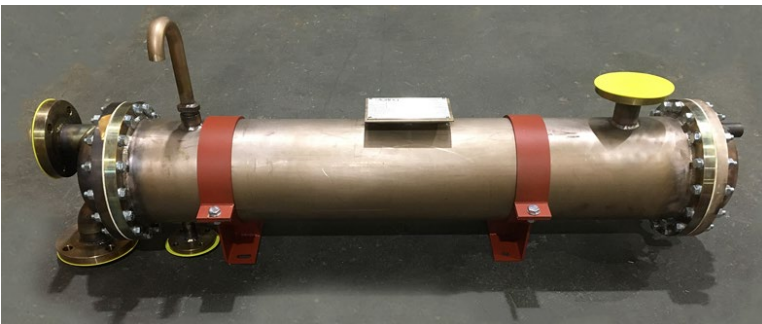

Our specialist services include:

- Onboard maintenance work
- Call-off contracts
- Alternative engineered solutions for spare parts
- Spare part stock holding
- De-risking of critical small rotating equipment

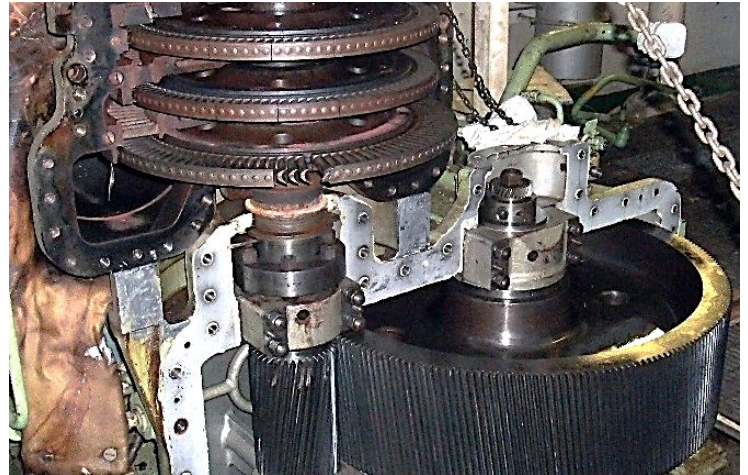

We are an innovative business

Where spare parts are not available or a repair is not possible onboard, Greenray can offer advanced engineering, using alternative engineered solutions.

Greenray can carry out plant condition monitoring and vibration analysis, along with technical consultancy and operator training, as required.

Cost-effective solutions, to meet the operational needs of your equipment.

At Greenray, it's safety first

Our team have an excellent safety record, working on a wide variety of critical small rotating equipment onboard FPSO vessels. We pride ourselves on meeting all necessary compliances.

Keeping your production operating

We have proven capability and deliverability working on:

- FPSO Turbo-Feed Pumps
- Inert Gas Blowers and Turbine Drives
- Forced Draft Fans and Turbine Drives
- Turbo Off-Loading Pumps
- Steam Driven Stripping Pumps
- Main Steam Turbo Generators

Greenray also have a demonstrable capability to deliver spare parts by alternative engineered solutions, such as, the complete manufacture of an FD fan steam turbine drive rotor and reversing segment or an ejector steam condenser.
