

Ruston TA Series Fleet Support

Keeping TA fleet operators supported - Globally

Proven capability

Greenray Turbine solutions Ltd. are proud to officially announce its title as the Appointed OEM for the Ruston® TA fleet. Our stewardship ensures that operators are able to confidently rely on their equipment, and a partner to deliver OEM expertise, supporting its operation long into the future.

The difference is Greenray

As the Appointed OEM of the Ruston® TA fleet, we are the custodian of the original design specifications, drawings, and records. Having complete access to the equipment IP allows us to provide the fleet with specific contract number solutions and Appointed OEM certified work scope and spares; where possible the materials provided can be a modernised, certified and a trusted solution.

Our support of the fleet is complete and includes:

- Globally Located Service Centres
- Engine overhauls
- Major Component Inspection & Repair
- Engine and Major Component Service Exchange
- Stockholding of OEM certified Core and Package parts
- Provision of planned service inspection
- Turbine Package health checks
- OEM certified field service & service centre support
- Industry leading warranties

Quality assured

Greenray are providing a market leading service and support the fleet no matter the location or situation. Our focus is supporting the fleet and its operators in a pragmatic and cost-effective manner, whilst promoting equipment efficiencies and longevity.

Quality assured,
with proven capability.

The confidence to give you peace of mind

Relax, you are in safe hands with Greenray. Our dedicated experts have over 200 years of combined product experience and in some cases this association goes back to design and development of key mechanical and electrical systems. This experience, twinned with our access to the full archive of original drawings and manuals allows us to deliver where others struggle.

How else can we help?

Our team can provide auxiliary systems and modular upgrades including:

- Controls and HMI support
- Controls upgrades and replacements
- Rustronic Mk II system rack replacements
- Lube oil systems
- Fuel systems & governors
- Fire & Gas systems
- Electronic overspeed protection
- Temperature monitoring
