

Steam Turbine Maintenance for the Sugar Industry

Always here to help you crush it!

Customer focused

We pride ourselves on our work with sugar producers, and understand the challenges faced with a high-volume production facility. We know our Bagasse from our Quintals.

Greenray Turbine Solutions are an independent service provider and are not affiliated to any specific product, supplier, or manufacturer.

This gives us the flexibility to provide a cost effective, customer focused service for your critical equipment.

We specialise in:

- Power and Co-generation turbine alternators up to 60 MW
- Preparation steam turbine drives
- Mill and Pump steam turbine drives
- Boiler fans

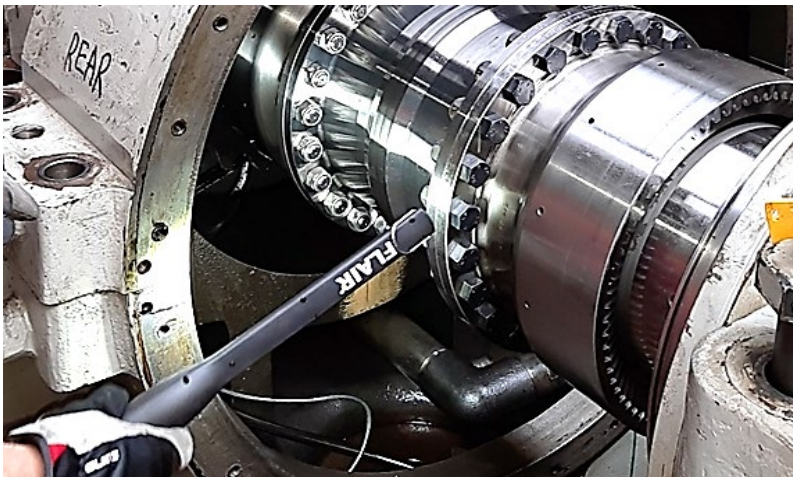

A full service

We know downtime is lost time!

So let us help, by providing everything you need to keep your core equipment well maintained and fully operational.

Our expert services Include:

- On Site and Workshop Inspection
- Full maintenance workshop facilities
- Minor and Major Overhauls
- Control Systems
- Training and Consultancy

Cost-effective solutions,
to meet your operational needs.

An innovative service

We can keep your machine running, by providing the skills and back up that you need.

Including:

- In situ repair skills
- Re-engineering of obsolete, expensive, or hard to locate components
- Spare parts call off to reduce delivery time
- Remote condition monitoring

We have the capability to deliver

We support all the major manufacturers, including:

Manufacturer	
ABB	GEC
Allen	Parsons
