

Maintain Your Team and Your Turbine

Introduction

We believe the key to achieving a sustained and reliable high performing turbine operation, is through a well-trained operations and maintenance team.

To further this, we have a long-standing commitment to delivering high quality training programmes.

Our Training Structure

Our scope of training can be as narrow or as wide as our customers require. However, they all follow our 4 - Step structure:

- **AIM** - What we AIM to deliver in terms of the training content, based upon the needs of our customer.
- **OUTCOME** - The learning OUTCOME for the delegates on the course.
- **SCHEME** - The method and structure of the training.
- **ASSESS** - Assess what the delegates have learnt and fill knowledge gaps where possible.

Train together, perform better

Our Training Style

Our training programmes can be prepared and delivered to suit our customer's needs; these can include:

- At our in-house training rooms
- At our workshop
- On-site at the customers location (UK & Non-UK)
- Theoretical training
- Practical training
- Inclusive course literature

The next step

Finding out more is easy, contact us, and we'll give you a dedicated response.
