

Workshop Repair and Overhaul

Keeping your plant operational

Cost effective solutions

As the OEM for the GEC Legacy fleet, we have the knowledge and resources to provide the repairs you need and the overhaul standards you expect. However, we are not limited, we can work with all major manufacturers of gas turbines, including:

- GEC
- Alstom
- Siemens
- Dresser Rand
- Ruston
- EGT
- English Electric
- Associated Electrical Industries

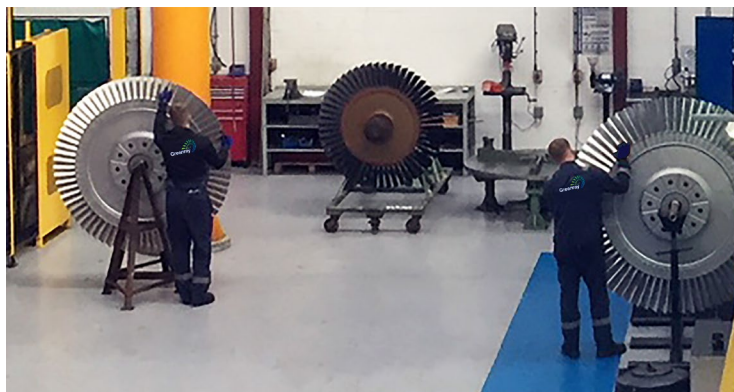

How we can help

We conduct repairs and overhauls, supporting the entire gas turbine package and the control system.

We know that older turbomachinery can become unreliable, and difficult to maintain. That's why we have equipped our workshop facilities with all that's required, to give you a first-class service and peace of mind.

**Comprehensive repair and overhaul
for your package.**

Why choose Greenray?

We have the backup to ensure your core components arrive safely in our workshop and will return to you for commissioning back into service, without fuss or delay.

We aim to minimise downtime, optimise reliability and manage costs, to suit your operational needs.

A complete service

Our overhaul Facilities include:

- Disassembly
- Inspection
- Cleaning and refurbishing
- Balancing

We work on variety of gas and steam turbine package elements, including:

- Power Turbine Rotors
- Power Turbine Nozzles
- Power Turbine Discs
- Power Turbine Bearings
- Inlet, Outlet and Transition Ducts

The next step
